

Our mission is the restoration of sight.

This is accomplished through:

Recovery, evaluation and distribution of the highest quality eye tissue for transplantation, as well as for ophthalmic research and training.

Funding of peer-reviewed research grants in support of improved diagnosis, treatment and prevention of eye and vision disorders.

Provision of public and professional education to increase awareness of the continuing need for donation of eye tissue, as well as all other tissues and organs.

Supporting the continued development of eye banking, domestically and internationally, and the continuing development of related professional disciplines.
